SKILLS

Technical Skills:

- Solid knowledge of Unity Engine (2D/3D), URP, and Cinemachine.
- Proficient in C# (.NET), OOP & SOLID principles, ScriptableObjects.
- Gameplay Architecture: FSM State Machine, MVC, Event-driven.
- Proficient in Unity UI Toolkit (UXML/USS) and UGUI paired with LeanTween.
- Performance Optimization: Generic Object Pooling (Zero GC Alloc), MaterialPropertyBlock.
- Firebase Auth & Realtime Cloud Database integration in Unity.
- Proficient in Git & GitLab, CI/CD GitHub Actions.

Soft Skills:

- Strong problem-solving mindset and rapid algorithmic reasoning.
- Team leadership capabilities and adherence to Git Flow workflow.
- Self-learning proficiency, fast adoption of new tech & AI tools.
- English: Proficient in reading international technical docs & Unity API.

CAREER OBJECTIVE

Short-term:

- Join a professional game development studio as a **Game Developer / Unity Developer**; quickly integrate into the team's Agile/Scrum workflow.
- Leverage C# OOP, Unity 6, and solid system architecture to contribute to commercial-grade gameplay features.

Long-term:

- Evolve into a skilled **Gameplay Systems Engineer**, mastering scalable system architecture and runtime loop optimization.
- Cultivate leadership and engineering capabilities towards a **Lead Game Developer** role.

EDUCATION

FPT POLYTECHNIC COLLEGE

5th/6th Semester Student | Major: Game Development

- GPA: **3.6 / 4.0**.
- Honored Student in Summer semester 2026.
- Excellent Student in Spring semester 2026.
- Honored Student in Summer semester 2025.
- Successfully completed Unity 2D/3D Capstones and Practical Studio Projects.

WORK EXPERIENCE

STUDIO PROJECT: FORTRESS IDLE: LAST STAND (GAME SPRINT 2026)

GitHub Repo

- **Project Title:** Hybrid Tower Defense & Idle Game (PC / Mobile) – Completed in 7 days.
- **Role:** Project Leader (Team of 2).
- **Tech Stack:** Unity 6 URP, C# (OOP/SOLID), FSM State Machine, Generic Object Pooling.
- **Responsibilities:** Designed FSM tower & enemy state machine; implemented Generic Object Pooling achieving 0 B GC Alloc in combat loops; optimized Draw Calls with MaterialPropertyBlock; designed double-precision economic scaling.
- **Outcome:** Won the Promising Award at GAME SPRINT 2026 competition.

PROJECT OTTERSHI: SUSHI MASTER (06 – 08/2026)

GitLab Repo

- **Project Title:** 2D Casual Action Arcade Mobile (Android / iOS).
- **Role:** Gameplay & Mobile Interaction Developer.
- **Tech Stack:** Unity 2D, C#, DOTween, ScriptableObjects, Android Touch API.
- **Responsibilities:** Implemented 2D physics flick & toss mechanics; calculated continuous elliptical conveyor trajectory; engineered real-time combo & Fever Mode systems; locked 60 FPS across mobile devices.
- **Outcome:** Graded Excellent in Major Capstone (Score: 9.8/10).

STUDIO PROJECT: RISE OF THE ELEMENTS (03 – 05/2026)

GitLab Repo

- **Project Title:** Hybrid Match-3 & Tower Defense Game (PC / Mobile).
- **Role:** Core UI/UX & Systems Architecture Developer.
- **Tech Stack:** Unity, C#, UI Toolkit (UXML/USS), Firebase Cloud, LeanTween.
- **Responsibilities:** Re-architected complete UI with Unity UI Toolkit (UXML/USS) and OnEnable/OnDisable lifecycle; implemented centralized DataManager with real-time Firebase sync; engineered server-authoritative lives/stamina system and CurrencyVFXSystem; resolved TimeScale desync and scene transition crashes.
- **Outcome:** Studio capstone project completed with distinction (Score: 9.5/10).

ACTIVITIES

- Won the Promising Award at GAME SPRINT 2026 game creation competition.
- Voluntary blood donation for the community organized annually by FPT Polytechnic Youth Union.
- Active contributor at FPT Poly Game Studio, mentoring junior students and conducting code reviews.
